

Scientific Advisory Committee Report

Jamie,

As you requested, the report from the FASS CAC committee is listed here. Basically, there is not much to report, however. Our last meeting was November 30, 2007. I provided an update from that meeting this past Spring. Dr. Maynard Hogberg, Iowa State University is not our administrative advisor. He told me back on Sept. 15 that the FASS board did approve the inclusion of a liason person from AVMA to the FASS SAC committee. That person might be Gail Golab. She has not been contacted yet, however. Also, the poultry training video is coming along slowly. Dr. Scotti Hester, will provide a short update on the progress of that. The other thing is that our committee is in discussion right now to decide whether we will meet this fall.

Other than these items, I have no further updates to provide. When we mee this fall, we will provide the minutes of the meeting shortly thereafter.
