Chairwoman Barbara Mikulski
Senate Committee on Appropriations
Room S 128, The Capitol
Washington, DC 20510

Ranking Member Richard Shelby
Senate Committee on Appropriations
Room S.146A, The Capitol
Washington, DC 20510

Chairman Hal Rogers
House Committee on Appropriations
H-305, The Capitol
Washington, DC 20515

Ranking Member Nita Lowey
House Committee on Appropriations
1016 Longworth House Office Building
Washington, DC 20515

Dear Appropriations Chairs and Ranking Members:

We, the undersigned organizations are writing to urge your support for the inclusion of the National Animal Health Laboratory Network in the Fiscal Year 2015 Agriculture Appropriations Bill. The NAHLN was authorized in the recently passed Farm Bill (Section. 12105). Serving as our nation’s most vital early warning system for emerging and foreign animal diseases, we are urging the members of the Appropriation Committee to fund the NAHLN at $15 million for fiscal 2015.

The NAHLN was developed in response to the Public Health Security and BioTerrorism Preparedness and Response Act of 2002, and the Homeland Security Presidential Directive – 9 (HSPD-9) of 2004 to “develop nationwide laboratory networks for food, veterinary, plant health and water quality that integrate existing Federal and State laboratory resources, are interconnected, and utilize standardized diagnostic protocols and procedures”.

During the past 12 years the NAHLN, composed of federal, university, and state veterinary diagnostic laboratories, has established the framework of a surveillance and emergency response system (not research) that provides critical and ongoing resources for laboratory testing, surveillance, information management, quality assurance and the development and validation of new tests.

Funding of NAHLN at $15 million would result in improved compliance with HSPD-9 by:

1. expanding surveillance and surge capacity of the NAHLN by increasing the number and level of participating state laboratories;
2. additional development of the infrastructure for electronic transmission of data between sample collectors, laboratories and state and federal databases; and
3. increasing efficiency and effectiveness of laboratory personnel training and employment both regionally and nationwide. Federal funding for the NAHLN at $15 million would be leveraged over six times by direct state appropriations in some states.

A survey of 34 NAHLN laboratories conducted by the American Association of Veterinary Laboratory Diagnosticians revealed direct state appropriations of $100 million to NAHLN laboratories toward total laboratory operation expenses of $186 million.

The NAHLN enables laboratories to test for economically devastating diseases such as bovine spongiform encephalopathy, foot-and-mouth disease, avian and swine influenza, and classical swine fever. Without the NAHLN and the early disease detection it provides, an outbreak of Foot and Mouth Disease (FMD) could cost US agriculture an estimated $128 billion. This includes decreased revenues for corn and soybean of $44 billion and $24.9 billion, respectively. This loss translates into roughly 154,000 jobs over the course of the outbreak.

An August 2011 report from the GAO and a report from the Commission on the Prevention of Weapons of Mass Destruction, Proliferation and Terrorism both gave the nation a failing grade for its ability to respond to and recover from a biological attack, natural disaster or animal disease event as required by HSPD-9. In
order for the nation to adequately respond to, and recover from, a biological attack; the NAHLN needs $15 million to ensure such a threat would be quarantined in a timely manner.

We thank you for your leadership on this vital issue to the agriculture industry and urge inclusion of this funding in the FY 15 Agriculture Appropriations Bill. Please let us know if you have any questions or if we can be of any assistance regarding this initiative.

Sincerely,
